MDVLCraft 1.9.20: class ranking, balance report and unused content

The ranking is worked out from the live trees: the totals of every node (see the Skill Trees PDF), each spell's and skill's mod data, and how the abilities combine. It has not been play-tested yet, so treat the tiers as a starting point.

1. Class ranking

#	Tier	Archetype	Class	Cost	Actives	Why
1	**S**	**Bloodborn**	Ranger	454	29	The most loaded tree in the pack: 13 blood spells, 5 Cursed Fate techniques and 11 Epic Fight skills, among them Combat Mastery, Forbidden Strength, Magic Blade, Shadow Step and Soul Protection. It also copies Cursed's spokes (+32% melee resistance, +105% technique efficiency). Heartstop, Devour and Blood Meteorite give it burst, sustain and range all in one tree.
2	**S**	**Necromancy**	Mage	475	34	30 spells, the most of any tree and 50% more than the average mage. +75% summon damage over an army of summons (Raise Dead, Vex, Drowned, Cursed Revenants, Procession of Souls). Blood into Mana and Mana Shield add sustain.
3	**S**	**Flame**	Mage	517	25	+39% cooldown reduction, about four times what any other tree gets (Wildfire 18%, Wildfire Mastery 12%, Focus 9%), on 20 spells with +300 mana and +144% mana regen. Spell uptime is far higher than any other mage's.
4	**S**	**Samurai**	Warrior	496	29	29 actives: 13 spells, 4 techniques (Stance, Myriad Blades, Blitz, Surprise Attack) and 12 Epic Fight skills. +95% katana damage, 45% damage reflection and 75% armour shred. Very strong both in melee and at range.
5	**A**	**Mage Hunter**	Warrior	503	22	Knight's defensive spokes plus +45% magic resistance and Magic Immunity, then Counterspell, Spellbreak Burst and Blackout. That hard-counters every mage tree. Greatswords scale from iron to netherite strength and it has 12 Epic Fight skills. Weak spots are few ranged options and long sword cooldowns.
6	**A**	**Lightning**	Mage	505	27	23 spells and the most mana of any tree (+332). Casting move speed (+75%) lets it kite while it casts.
7	**A**	**Holy**	Mage	514	22	19 spells, +75% healing and the highest mana regen (+150%). The best sustain and party support, with less burst than Flame or Lightning.
8	**A**	**Phantom**	Rogue	513	22	+95% rapier damage, +90% riposte damage, the highest attack speed (+35%) and 10 Epic Fight skills. Phantom Movement gives it the best mobility in the pack.
9	**A**	**Berzerker**	Warrior	458	22	The most flat attack damage (+6.5), 15% life steal, +90% axe damage and 13 Epic Fight skills. Only 9 spells, so it lacks range.

10	**B**	**Knight**	Warrior	510	20	The tankiest tree (38% resistance, 45% projectile resistance, +13.5 armour, +7.5 toughness, 12 stun armour), but its damage is low and most of its 11 spells are defensive.
11	**B**	**Ice**	Mage	483	24	21 spells and 42% magic resistance. A solid control mage without a standout.
12	**B**	**Water**	Mage	489	24	Mirrors Ice (21 spells, 42% magic resistance) with Traveloptics aqua spells. Strongest near water.
13	**B**	**Monk**	Warrior	450	15	+7.1 flat unarmed damage, +90% fist mastery, +33% attack speed and 7 techniques (Knockout, Barrage, Leaping Crush, Uppercut and others). Excellent one on one, but it has only 1 spell, so almost no range.
14	**B**	**Assassin**	Rogue	430	17	+95% dagger damage, +90% backstab damage, 45 armour negation and 60% protection shred. Huge opener, but only +7 max health.
15	**B**	**Cursed**	Ranger	437	18	10 spells and 5 techniques including Soul Hunt. Its spokes are good, but Bloodborn copies them and adds far more abilities.
16	**C**	**Warlock**	Mage	431	16	The thinnest mage: 9 spells and 1 technique, three of them stuck at level I (Sculk Tentacles, Sonic Boom, Abyssal Blast) because of their mana cost. Eldritch power +54% is fine; the tree is just short on tools for its cost.
17	**C**	**Druid**	Ranger	440	18	16 spells but only 2 Epic Fight skills and the lowest mage-like mana (+146). Nature regen is good; burst is poor.
18	**C**	**Scout**	Rogue	421	18	A utility tree (Silent Appraisal, Haste, Touch Dig, Planar Sight). Five techniques, but few that deal damage.
19	**C**	**Wanderer**	Ranger	463	15	Mounts and tamed animals (+93% tamed damage), huge stamina and jump. 9 spells and 1 technique; low personal damage.
20	**C**	**Stalker**	Ranger	420	13	Ranged only: 10 arrow spells, +57% ranged damage and 3 Epic Fight skills. Falls off once enemies reach melee range.
21	**C**	**Thief**	Rogue	416	15	Loot and utility (Fortune 3, +13 luck, -60% repair cost, +3 reach). The cheapest tree (416 points). Most of its 11 spells are gimmicks.

2. Balance changes I would make

In order of impact. Numbers are whole-tree totals; every change is a data edit to the tree JSON (spoke values, node rewards) or to the per-spell config, with no code needed.

1. **Flame: cut cooldown reduction from 39% to about 15%.** Wildfire spoke 18% to 6%, Wildfire Mastery 12% to 0 (swap it for +0.2 fire spell power), keep Focus 9%. Every other mage gets 6 to 10%, and cooldown reduction stacks with the pack's global CDR, so Flame casts about 1.6 times as often as the others.
2. **Necromancy: trim from 30 spells to about 22.** Its 3 natively fire spells (Abyssal Burn, Fire Orbs, Damned Demoman's) are off-theme: drop them. Move 4 of its natively cursed-school spells (Umbral Coffin, Choir of Flies, Grave Dust, Issue Invoice) to Warlock and Cursed. Summon damage stays at +75%.
3. **Warlock: make it a full mage.** Take the cursed-school spells from Necromancy above and add the unused eldritch spells Abyssal Shroud, Eldritch Gambit and The Forgotten Beast, plus void spells from

the unused ender list (Void Eruption, Orbital Void, Abyssal Orbs). Raise Sculk Tentacles, Sonic Boom and Abyssal Blast to level 2 by lowering their mana multiplier to 0.6 (they are held at I by the 100-mana cap). Add +0.1 cast time reduction.

4. **Bloodborn: give it its own spokes and fewer free skills.** Replace the copied Cursed spokes with blood ones: blood spell power 0.28 to 0.45, drop technique efficiency to 0.5 and melee resistance to 0.15. Cut Epic Fight skills from 11 to 7 by removing Spider Techniques, Manipulator, Adrenaline Fiend and Essence Extortion. Raise Devour and Heartstop cooldowns by 25%.
5. **Mage Hunter: cap anti-magic stacking.** Magic resistance +45% to +25%. Magic Immunity plus spell resistance plus Counterspell already make it nearly untouchable for mages. Leave the greatsword scaling as it is (it needs 250 points to reach netherite).
6. **Samurai: lower katana damage +95% to +70% and damage reflection 45% to 25%.** It has more actives than any warrior. Reflection on a tree that also parries and shreds armour turns every exchange in its favour.
7. **Thief: entity reach +3 to +1 and give it combat tools.** +3 reach is the biggest melee advantage in the pack. In return add two unused damage spells (for example Carian Slicer and Swift Glintstone Shard) and an unused Epic Fight dodge (Murasama Dodge).
8. **Stalker: add melee answers and Loretta's Greatbow.** Add Loretta's Greatbow (unused) as its capstone spell and one unused dodge (Better Step) so it can get out of melee. Ranged damage +57% to +70%.
9. **Druid: more mana and an Epic Fight kit.** Max mana +146 to +220 (it is a caster tree with ranger mana). Add the unused nature spells Poison Spray, Primal Pack and Stele Cascade, and two Epic Fight skills from the unused list (a guard and a passive).
10. **Scout and Wanderer: one damage spell each.** Scout: Spiral Shard or Rock Sling. Wanderer: Glintstone Arc. Both trees are fine for utility but fall behind in fights.
11. **Cursed: separate it from Bloodborn.** Once Bloodborn has its own spokes (above), Cursed keeps technique efficiency +105% as its identity. Add one unused cursed_school spell.
12. **Monk: one ranged option.** Add Fire Fist (Alshanex's Familiars, unused) or a short dash technique so Monk has something against fliers and ranged mobs.
13. **Knight: raise damage slightly.** Greatsword damage +90% to +100% and one offensive spell (Carian Greatsword fits). It is the best tank but rarely kills anything.
14. **Global: mana regen gap.** Mages get +140 to 150% mana regen and rogues +59%, while rogue trees now carry many spells. Raise rogue and ranger regen spokes by about 25% so their spells are usable.
15. **Global: pairing limits.** With 2 archetypes per player, Bloodborn + Necromancy (both blood power) and Flame + any mage (stacked CDR) are the strongest pairs. The per-tree fixes above remove most of this. If pairs still stand out, add a soft rule that two trees of the same class share half their spoke bonuses.

3. Unused Epic Fight skills (73)

Equippable skills (passive, dodge, guard, identity, mover and the mods' own slots) that no tree grants. The 164 weapon innate and weapon passive skills are left out: they come with their weapons. So are Roll, Step, Guard, Parrying and the soul-like dodge, step and parry, which every player starts with.

4. Unused spells (235)

Every registered Iron's Spells spell (base mod and addons) that no tree grants, grouped by mod. Max level is the level cap in the pack's spell config.

esoteric_spell (56)

Spell	School	Max	What it does
Aegis Barrier	Barrier	8	Creates a barrier that reduces magic damage for allies inside it.
Auto Device	Barrier	10	Summons automatic arcane devices that follow behind you in a ring formation.
Auto Javelin Magic	Barrier	8	Creates an Auto Javelin magic circle over the caster. The circle fires larger piercing barrier javelins at the locked target every 1.5 seconds.
Auto Lances Magic	Barrier	6	Creates an Auto Lances magic circle over the caster. The circle fires piercing barrier lances at the locked target every 2 seconds.
Barrier Aura	Barrier	8	Creates a moving aura that grants Protection to allies. The aura vanishes when its owner takes actual damage.
Blast	Barrier	8	Must target an entity. Channels magical energy at the target, then detonates in a planar splash.
Brave Aura	Barrier	8	Creates a moving aura that grants Brave to allies. The aura vanishes when its owner takes actual damage.
Chronos Shift Magic	Barrier	3	Copies the last Esoteric spell cast recently. Familiar, aura, barrier and excluded spells are not copied.
Crash Magic	Barrier	4	Calls down fast crash meteors at the target position. Symphony can copy this spell.
Cycle Aura	Barrier	6	Creates a moving aura that grants Cycle to allies. The aura vanishes when its owner takes actual damage.
Device: Array	Barrier	3	Each device independently finds a target, teleports above it and periodically fires a beam.
Device: Chase	Barrier	8	Commands automatic devices to fire chase beams after you deal Esoteric spell damage.
Device: Counter	Barrier	8	Commands automatic devices to counterattack enemies that damage allies within range.
Device: Missile	Barrier	10	Commands automatic devices to periodically fire magic missiles at nearby hostile targets.
Device: Suppression	Barrier	4	Devices track the locked target, fire several rapid suppression volleys, then resume their prior command.
Device: Vulcan	Barrier	6	Selects up to five targets. Selected devices vanish, appear above their targets, then fire heavy Vulcan beams in sequence.
Esoteric Missile	Barrier	5	Launch an Esoteric Missile and gain Esoteric Technique.
Esoteric Shackles	Barrier	6	After charging, bind non-allied entities in the targeted area; each shackle can be destroyed independently.
Esoteric Step	Barrier	8	Teleports toward the aimed position after channeling. A destination beyond the maximum range is clamped along the same direction.
Familia: Black Cat	Barrier	10	Summons a black cat familiar at the target position. While present, it grants its owner Familia: Black Cat.
Familia: Blizzard	Barrier	8	Commands an existing familiar to channel a blizzard at the target position, pulling and damaging enemies inside it.

Familia: Guide	Barrier	6	Commands your familiar to gain Guide, letting it automatically channel Lightning, Blizzard or Meteor while idle.
Familia: Imperial Ray	Barrier	4	Commands an existing familiar to summon a descending imperial ray that damages enemies it touches.
Familia: Lightning	Barrier	10	Commands an existing familiar to strike the target location with lightning.
Familia: Mana Feedback	Barrier	3	Commands your familiar to gain Mana Feedback, restoring mana to its owner when familiar spells finish.
Familia: Meteor	Barrier	6	Commands an existing familiar to call down meteors at the target location.
Familia: Research	Barrier	3	Grants Magic Circuit, reducing familiar cast time and increasing damage dealt by familiar spells.
Familia: Stone Skin	Barrier	8	Commands your familiar to channel Stone Skin, converting shield absorption into effect duration.
Familia: Symphony	Barrier	3	Grants Spell Symphony. While active, familiars have a chance to copy some Esoteric spells with the Magic prefix.
Fast Reaction Aura	Barrier	4	Creates a moving aura that gives allies a chance to dodge incoming attacks. The aura vanishes when its owner takes actual damage.
Finale Magic	Barrier	4	Marks three concentric circles, then raises three vertical beams from the center in sequence.
Flowing Barrier	Barrier	10	While channeling and while the effect lasts, sourced damage is reduced and restores mana based on its original amount.
Guandian Beam Magic	Barrier	4	Creates a light-guard barrier. Barrier-school spell casts inside it can fire guiding beam projectiles at hostile targets.
Guardian Barrier	Barrier	6	Creates a barrier that grants Guarding to its caster and redirects enemies targeting allies inside it.
Health Aura	Barrier	10	Creates a moving aura that heals allies every second and grants Energy Aura to the caster. The aura vanishes when its owner takes actual damage.
Immunity Aura	Barrier	6	Creates a moving aura that has a chance every 2 seconds to cleanse one random non-beneficial effect from each ally. The aura vanishes when its owner takes actual damage.
Laser Magic	Barrier	5	Fires a sequence of esoteric lasers. When copied by Symphony, it fires once every 0.5 seconds until all shots are spent.
Magic Blade: Conversion	Barrier	10	After a weapon successfully hits, consumes mana to convert part of the wielder's attack damage into Esoteric spell damage. Conversion and Enchanting can both trigger.
Magic Blade: Dual Bringer	Barrier	5	Clears the previous conversion when channeling starts. On completion, excess spell power becomes attack damage and attack damage becomes spell power; the calculated values remain fixed until expiration.
Magic Blade: Enchanted Burst	Barrier	4	Bursts the locked target and grants Magic Blade Enhancement, increasing Enchant Slash and Element Slash damage by 25%.
Magic Blade: Enchanted Spell	Barrier	4	Successful weapon hits lock the target and instantly cast Auto Arrow, Auto Javelin, Auto Lances, Blast, or Storm at random without mana cost. All five share one trigger cooldown.
Magic Blade: Enchanting	Barrier	8	After a weapon successfully hits, adds Esoteric spell damage based on that weapon's displayed attack damage without consuming extra mana.

Magic Skin	Barrier	5	Reduces damage according to current mana percentage without consuming mana. More remaining mana provides more reduction.
Mana Aura	Barrier	10	Creates a moving aura that restores mana to allied players every second and grants Energy Aura to the caster. The aura vanishes when its owner takes actual damage.
Mana Change Barrier	Barrier	10	Creates a barrier that restores mana to allies in range instantly and every second thereafter.
Mana Resonance	Barrier	6	Balances your current health and mana ratios, then grants Mana Resonance.
Maximizer Change Barrier	Barrier	4	Instantly cancels your own Mana Change Barrier and injects the remaining mana to be restored into allies in range (cast inside a Rapid Change Barrier for Full Mana).
Namesis Magic	Barrier	4	The first cast accumulates Namesis levels and cannot be copied. The second cast requires a target and can be copied by Symphony, Chronos Shift, and Origin Devices; copied Namesis barriers are independent.
Prayer Barrier	Barrier	4	Creates a barrier that grants allies Prayer, increasing spell power.
Protection Barrier	Barrier	10	Creates a barrier that reduces non-magic incoming damage for allies inside it.
Qadal Magic	Barrier	5	Grants Qadal. Your next Esoteric spell consumes extra mana, gains stronger spell-power scaling, and adds mana overload.
Quick Motion Aura	Barrier	5	Creates a moving aura that grants Quick Motion to allies. The aura vanishes when its owner takes actual damage.
Rapid Change Barrier	Barrier	1	Creates a barrier where casting Mana Change Barrier boosts per-second mana restore by 20%, and casting Maximizer Change Barrier grants allies the Full Mana status.
Resurrection	Barrier	5	Records Resurrection data for the caster and nearby allies. Consumed to prevent death; Stasis damage or a Stasis effect prevents activation.
Sanctuary Barrier	Barrier	5	Creates a barrier that reduces small damage hits taken by allies inside it.
Spell Calibration	Barrier	5	Grants Spell Calibration. Esoteric spell damage reduces the target's invulnerability time by 20% per level.

Spell	School	Max	What it does
Body Rewind	Time	3	First cast records your position, health and hunger. Cast again before the anchor expires to return; expiry only removes the anchor. Legendary can consume a safe anchor to prevent death. Inventory, mana, cooldowns and world state are never rolled back.
Borrowed Time	Time	2	Accelerates movement and ongoing health/mana regeneration for six seconds, then locks movement for two seconds. The approaching lock is signalled in advance. Reconnecting or changing dimension cannot erase the payback.
Chronal Bolt	Time	10	Fires a focused temporal lance at the target.
Chrono Step	Time	4	Steps safely along your aim and leaves a player-sized, two-HP temporal decoy for two seconds. Only hostiles already pursuing you may switch to it. The step cannot pass through blocked body space.
Paradox	Time	5	Marks one enemy for three temporal strikes, each based on its maximum health. Highest level: 7% per strike, 21% total before legitimate mitigation. Ordinary spell-power bonuses cannot amplify that percentage. No splash damage.
Prepared Cut Back	Time	5	Sneak-cast to restore yourself, or aim at an ally without sneaking. Restores 40% of maximum health and up to eight food points for players. Hostile targets cannot be healed. Higher levels improve reach and mana efficiency.
Slowdown	Time	5	Slows an eligible enemy and its temporal movement. Downward marks and slow clock hands distinguish it from Speedup. Higher levels improve duration, range and slowing strength.
Target Rewind	Time	3	First cast marks one eligible entity and its current position. The second cast returns that same entity, not a new target. The native return timer and world echo show the active mark. Health is unchanged; expiry never teleports automatically.
Temporal Anchors (disabled in its config)	Time	1	Retired compatibility entry. Existing worlds, scrolls and books remain readable, but this ability cannot be cast or obtained. Use Body Rewind or Target Rewind.
Temporal Wall	Time	4	Raises a translucent temporal barrier. Eligible hostile creatures and projectiles cannot simply cross it; the caster and permitted allies remain free. Higher levels widen and heighten the wall without making it opaque.

Time Stop	Time	3	Suspends eligible creatures and moving entities inside a local field, including Creeper fuses and projectiles. The caster and their own projectiles remain free. Boss exceptions and PvP rules still apply; world time and cooldowns continue.
